

RECAMBIOS

ELF - ELFM - ELF | MATIC J16 1L.

Elf Elfmatic J6 lubricant for automatic gearboxes.

Good starting conditions under low temperatures.

Avoids noisy problems when shifting speeds thank to its good shear stability ensuring a sufficient viscosity at high temperature

Ensures very good shifting at all temperatures.

Gives good protection of gear teeth even under most severe stresses thanks to its extreme pressure properties.

Maintains good shifting all along the gearbox life with its outstanding friction behaviour.

Reinforces protection against wear, especially regarding to gearbox mechanical devices

Excellent thermal stability and oxidation resistance.

Very high resistance to shear.

Outstanding anti-rust and anti-corrosion capability.
